EXPERIENCE

Software Engineer

Dec 2025 – June 2026

Robinhood

Menlo Park, CA

- Architected end-to-end filtering across brokerage and account-management types, enabling marketing to target 10+ distinct account segments and lifting campaign conversion.
- Shipped high-impact launches across crypto, giveaways, and Super Boost, contributing to growth that reached 4.3M Robinhood Gold subscribers.
- Built a Kafka-based distribution pipeline using consumers and event publishing, successfully distributing crypto coins to over 1M users across 3 promotion timelines.
- Expanded eligibility logic for trust accounts and platinum credit cards, unlocking Robinhood Gold enrollment for previously unsupported account types.
- Engineered Airflow DAGs and a new feature store for the Super Boost promotion, aggregating values across multiple APIs and data stores to compute new derived features.

Software Engineer

July 2024 – Dec 2025

Applied Materials

Santa Clara, CA

- Optimized ClickHouse database performance using SQL and PyArrow, reducing query execution times by 98% through efficient data processing and indexing strategies.
- Conducted performance testing on database query execution times, resulting in a 30% improvement in runtime transparency and identification of high-impact optimization opportunities.
- Implemented and enhanced efficient REST APIs for UI needs, reducing page load times by 40% through streamlined endpoints.
- Engineered comprehensive tests for APIs and data transformers, boosting test coverage from 60% to 85% and enhancing system reliability.
- Spearheaded development of a dynamic data batch loader, reducing memory usage by 47% and increasing batch throughput from 10k to 25k records per second.

Web Development and Data Visualization Intern

Sep. 2023 – June 2024

Channel Islands National Marine Sanctuary

Santa Barbara, CA

- Developed a customized WordPress content management system, reducing content update times by 25%.
- Leveraged WordPress and custom JavaScript to build a data visualization platform for National Marine Sanctuaries, displaying vital data encompassing over 663,000 square miles of protected aquatic habitats.

Jr. Software Engineering Intern

July 2023 – September 2023

Y STEM and Chess

Santa Barbara, CA

- Built new frontend features for a web application using Angular 9, resulting in a 20% increase in user engagement and a 15% decrease in page load time.
- Improved backend functionalities by implementing additional endpoints using NodeJS Express and MongoDB, resulting in a 30% increase in data processing speed.

Undergraduate Research Assistant

Sept. 2022 – June 2023

Bionic Visions Lab

Santa Barbara, CA

- Deployed a content management system with an authorization and verification system, increasing efficiency and accuracy of website updates by 40%.

EDUCATION

University of California, Santa Barbara

June 2024

B.S in Computer Science

GPA: 3.64

TECHNICAL SKILLS

Languages: Java, Python, Go, C/C++/C#, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, REST API, Pytest, PyArrow, PyTorch, TensorFlow, WordPress

Developer Tools: Git, Docker, Kubernetes, ClickHouse, MongoDB, Jenkins, Jira, VS Code, Figma, Unity

Methodologies: Agile, Scrum, CI/CD
